

# Durability Testing

## Wide Range of Services

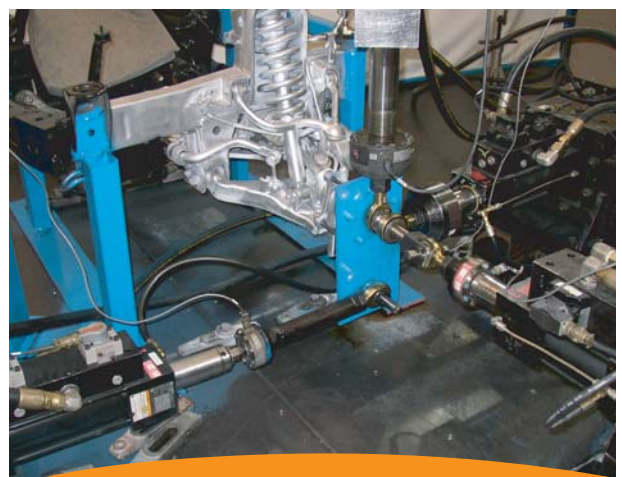

- Component-level (in-lab) testing through full vehicle Proving Grounds evaluation

## Specialized Facilities

- MAST (Multi-Axis Simulation Table) combined with Environmental
- Multi-Channel load fatigue
- Electrodynamic (ED) Vibration multiple shaker sizes
- Mechanical and electrical life cycle combined with environmental
- High channel on-board DAS and instrumentation
- Full vehicle Proving Grounds with custom courses

## Experience / Capabilities

- Full Data Processing Damage Analysis
- Test Development - Public Roads to Proving Grounds to Test Lab
- Familiarity with OEM and Standard Industry Procedures
- Engineers with Large Range of Specific Product Development Experience
