

Equipment Design & Fabrication

Experienced Personnel

- Our equipment is designed by experienced design and test engineers
 - Critical issue to get testing personnel involved with equipment design
- MGA Equipment is used and refined in our own testing laboratories before outside sales

Equipment

- MGA designs equipment to perform both U.S. (FMVSS) and European (ECE) safety standards
- MGA designs and installs Testing Facilities to meet customer needs including Central Hydraulics, Temperature Chambers, Cooling Towers, Test Cells
- Durability systems for life cycle testing
- Quasi-Static strength test equipment
- Turn Key Crash and Accelerator Sleds

Fabrication Center

- Located in Buffalo, New York
- Complete manufacturing center for design and fabrication
 - Electrical design and build
 - Software engineering
 - Full machine and welding shop
 - Assembly and checkout facility
 - Training facility
