

Product Development

Vehicle Durability

- 400-acre facility including Proving Grounds
 - Motorcycles, Passenger Vehicles, Military
 - Off-Road and Construction Equipment
- Full Vehicle Durability Evaluations
 - Chassis
 - Powertrain/Driveline
 - Combination
 - Warranty & New Product Shakedown
 - Test Methodology Development
- Road Correlation
 - Determination of durability acceleration factors

Airbag & Sensor Development

- Rough Road and Airbag Abuse (Frontal, Side, Rollover Systems)
 - Sensor and system algorithm developmental testing
 - Passenger cars, SUVs, light trucks

Environmental

- Corrosion
- Noise Evaluations

Development

- Brake Testing
- Ride and Handling
- Specialized
